

*Browne E, et al. The relationship of human papillomavirus positivity with tumor characteristics in an Irish penile cancer population*

**APPENDIX**

<b>Supplementary Table 1. Distribution of p16<sup>INK4a</sup> staining</b>		
<b>Characteristics</b>	<b>p16-positive n=45</b>	<b>p16-negative n=25</b>
<b>Histological subtype, n</b>		
Basaloid	12	0
Papillary-Basaloid	1	0
Usual	6	22
Warty	5	1
Warty-Basaloid	20	1
Usual & Warty	1	0
Verrucatus	0	1
Sarcomatoid	0	0
<b>T stage, n</b>		
PeIn	9	3
pT1a	6	7
pT1b	7	4
pT2	13	8
pT3	9	3
<b>Grade, n</b>		
Not given/not applicable	11	4
G1	0	4
G2	15	10
G3	19	7
<b>Nodal status, n</b>		
NX	9	10
N0	17	10
N1	6	4
N2	3	1
N3	1	0
<b>Perineural invasion, n</b>		
Not given	12	3
Present	13	7
Absent	20	15
<b>Lymphatic invasion, n</b>		
Not given	12	3
Present	12	5
Absent	21	17
