I was very fortunate to be the recipient of the Canadian Urological Association/European Association of Urology (CUA/EAU) exchange program to attend EUREP2022 held in Prague, Czech Republic. This educational program has been in place for 20 years, offering a comprehensive review course for final-year residents from across Europe to assist in urology board exam revision.

The quality of didactic lectures was excellent, with a host of international experts delivering engaging and succinct presentations covering the breadth of urology over six days. Additionally, the program offered the largest surgical simulation center in Europe, with experienced instructors giving one-on-one instruction in laparoscopy, ureteroscopy, and transurethral resection.

The opportunities to meet colleagues from around the world was invaluable and I made lifetime connections. The city of Prague is beautiful, and I was able to socialize with both urologists and non-urologists over amazing Czech cuisine and pilsner.

I am very grateful to the CUA and EAU for facilitating my attendance at EUREP2022, and I hope future exchange program winners will have as good of an experience as I did!
