

*Barletta et al. Impact of ISUP grade group on cancer-specific mortality in radical prostatectomy-treated prostate cancer patients with organ-confined disease*

**APPENDIX**

<b>Supplementary Table1. Multivariable Cox-regression models testing predictor status of ISUP grade group (4 vs. 5) for cancer-specific-mortality in 61 172 organ-confined at radical prostatectomy prostate cancer patients identified within the Surveillance, Epidemiology, and End Results database (2004-2015)</b>		
<b>Predictors</b>	<b>HR (95%CI)</b>	<b>p</b>
<b>ISUP grade group</b>		
4	Ref.	–
5	3.64 (1.96–6.77)	<0.001

Analyses adjusted for: age at diagnosis, prostate-specific antigen, and positive surgical margins.  
HR: hazard ratio; CI: confidence interval.
