

APPENDIX

Supplementary Figure 1. Receiver operating curve (ROC) for K10 predicting (A) depression (CES-D-R20) and (B) anxiety (GAD-7). For depression, area under the curve (AUC) was 0.975 and for anxiety, it was 0.923, suggesting strong discriminative ability for depression and anxiety symptoms.

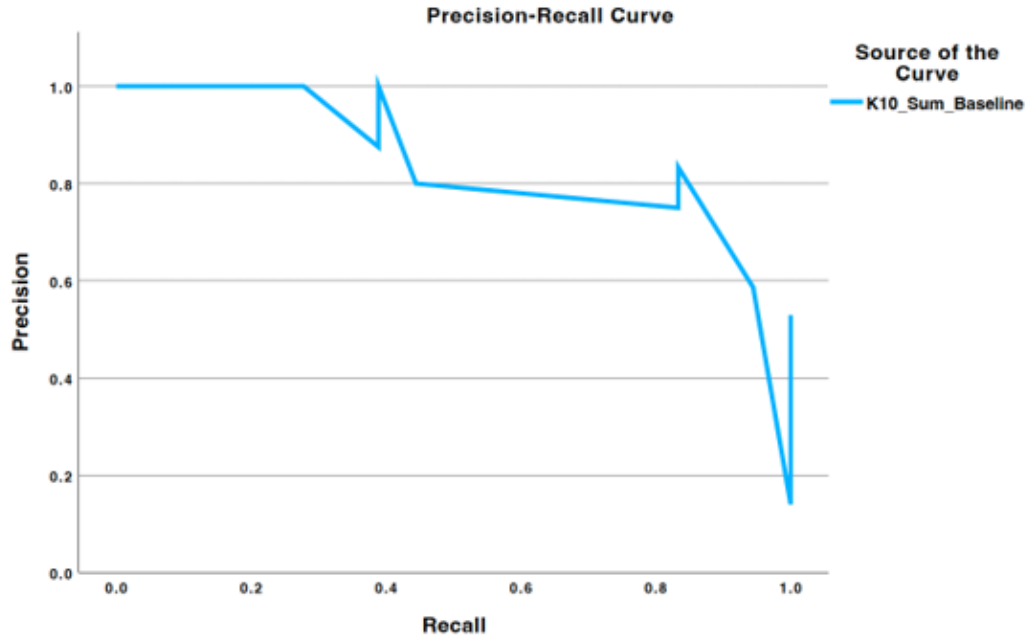

A. CES-D-R20

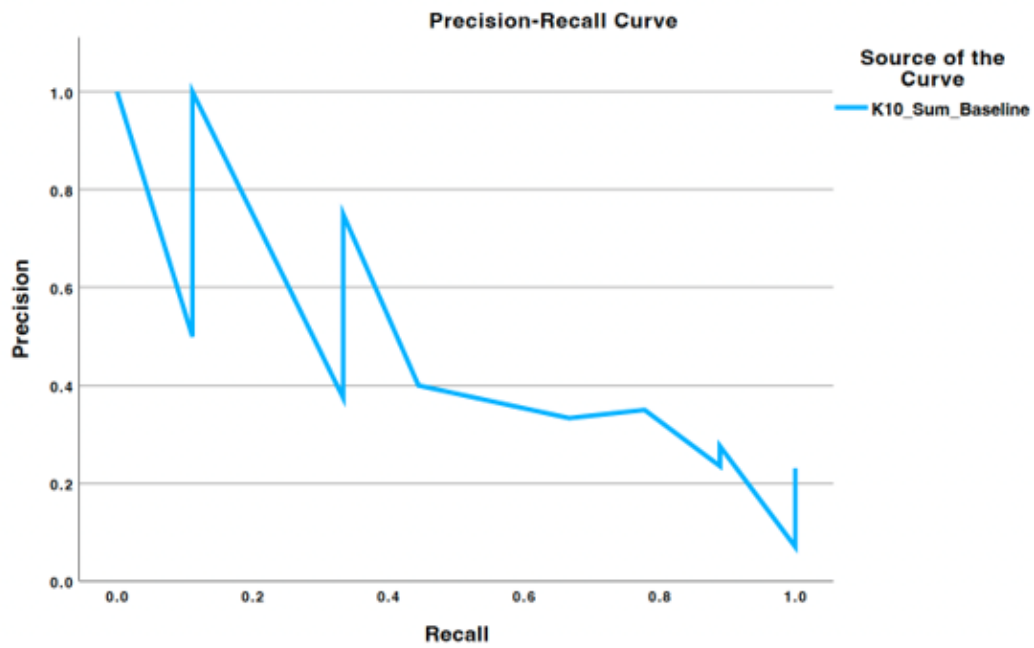

B. GAD-7

Supplementary Figure 2. Precision-recall curve for K10 predicting (A) depression (CES-D-R20) and (B) anxiety (GAD-7).

A.

B.
