

APPENDIX

STROBE Checklist

Title and abstract

Item	Recommendation	Reported Section
1a	Study design indicated in title or abstract	Abstract
1b	Informative and balanced summary	Abstract

Introduction

Item	Recommendation	Reported Section
2	Scientific background and rationale	Introduction
3	Specific objectives and hypotheses	Introduction

Methods

Item	Recommendation	Reported Section
4	Study design	Methods
5	Setting and dates	Methods
6a	Eligibility criteria	Methods
6b	Not applicable	unmatched cohort study
7	Outcome and predictors defined	Methods
8	Data sources and measurements	Methods
9	Bias	Methods
10	Study size	Methods
11	Handling quantitative variables	Methods
12a	Statistical methods	Methods
12b	Not applicable	No subgroup or interaction analyses performed

Results

Item	Recommendation	Reported Section
13	Participants flow	Results
14	Descriptive data	Table 1-4
15	Outcome data	Results
16	Main results with precision	Tables 1–4

Mostafa et al. Distinct predictors of stress vs. urge urinary incontinence after transurethral prostatectomy: A prospective cohort study

17	Not applicable	No additional or sensitivity analyses conducted
----	----------------	---

Discussion

Item	Recommendation	Reported Section
18	Key results summarized	Discussion
19	Limitations	Discussion
20	Interpretation	Discussion
21	Generalisability	Discussion

Other information

Item	Recommendation	Reported Section
22	Funding	Title Page
